

**PRESS RELEASE**

## **DIDIER MIRATON APPOINTED CHAIRMAN OF THE SUPERVISORY BOARD OF PYLOTE**

**Toulouse, January 15, 2018** - Pylote, the new industrial player in the green mineral chemistry, is pleased to announce the appointment of Didier Miraton as Chairman of the Supervisory Board. Didier Miraton will bring his expertise and his knowledge of the industrial world gained rich experiences, including in international groups such as Michelin or Pierre Fabre.

Didier Miraton's appointment comes at the time when Pylote is speeding up its development on the markets of the cosmetic, food and pharmaceutical specialties in Europe, in the United States, Brazil and Japan

Indeed, Pylote has recently signed contracts pre-industrial with dozens of laboratories or the packaging industry, as with CL Tech a few weeks to remove the preservatives of cosmetic products, or agreements of mutual referencing agreement (SMO), like the one announced with Pharmaster in October 24 to offer to their respective clients innovative & secure unpreserved ophthalmic solutions.

The Pylote innovation is in the development and use of ceramic microspheres, 2 to 5 microns, which are inserted directly in the materials during the production of the products. For its antimicrobial technology, these mineral oxides generated a substance acting as a catalyst which decontaminates the packaging to protect the products and consumers.

*"I am particularly pleased with the appointment of Didier who will bring us his deep knowledge of the markets on which Pylote is present, as well as its expertise in the field of industrial development »* stated Loïc Marchin, CEO of Pylote.

*"I am grateful for the confidence that has been expressed to me by the Supervisory Board of this innovative SME with strong potential for development. All teams are now in working order to develop the activity of Pylote, including high margin markets as the pharmaceutical industry or that of cosmetics"* stated Didier Miraton, Chairman of the Supervisory Board of Pylote

Graduate of the École Nationale des Ponts et Chaussées engineering French school, Didier Miraton began his career in 1982 as a research engineer at Michelin. Then, he held several positions in France and the United States, including Director of Technology Center and a member of the Group Executive Committee. From 2007 to 2011, he acted as managing partner of the Michelin Group. In 2012, Didier Miraton is appointed CEO of the Pierre Fabre Laboratories. Didier Miraton today is Professor at the Collège des Ingénieurs MBA in Paris and advisor to several companies.

**ABOUT PYLOTE** - Founded in 2009, Pylote is committed to green industrial chemistry in the mineral and ceramic chemical sector. Through the range of its efficient PYCLEAR™ solutions, Pylote conceives and develops innovative mineral microspheres to sell solutions which can be integrated into numerous consumer products. Pylote's solutions have a major competitive advantage as they make the end products smarter, by giving new and specific advantages and attributes to materials, with no change to the existing manufacturing process. Pylote helps their clients, who are present in pharmaceutical, cosmetic, luxury, food or industrial markets, to propose end consumers with more eco-friendly products that are greener, cleaner and safer.
